

Dear all,

As you all may already know, DG Energy is about to set up and test a new initiative called the EU Corporate Covenant. It is intended that the EU Corporate Covenant will become a bottom-up voluntary initiative encouraging companies – foremost but not exclusively SMEs – to bring or step up their contributions to a clean energy transition and climate action.

For this reason, I would like to draw your attention on the ongoing survey where you can submit your feedback on this initiative via the following link:

[https://www.surveymonkey.com/r/EU\\_Corporate\\_Covenant\\_Survey](https://www.surveymonkey.com/r/EU_Corporate_Covenant_Survey)

The outcomes of the current consultation phase will help to guide the pilot deployment of the EU Corporate Covenant whom kick-off is expected early next year.

As this consultation phase is closing the end of next week, this is the last chance to provide your expert feedback on the proposed approach of the EU Corporate Covenant.

You can learn more about the Corporate Covenant by way of the attached study and related summary.

With best regards  
LIFE CET Industry Team
